Achtung!

Hängeelemente exakt nach Vorgabe montieren!
Alle kippgefährdete Elemente mit den mitgelieferten
Kippsicherungen befestigen!

Bitte beachten!

Bild 2, Kippsicherungen montieren!

Bei allen U-Schränken 8R, wird ein Befestigungswinkel mit Metallzapfen als Kippsicherung montiert. Hierbei wird eine Senkschraube 5x60mm und ein Kunststoffdübel Durchm. 8mm verwendet. Nur bei Schrägmontage deckt die **13mm Abdeckplatte** den Beschlag ab.

Bild 3, Glasboden am Wandpaneel befestigen

Bild 4, Wandpaneele+ Hängeschränk bohren

Die mitgelieferten Dübel sind für folgende Untergründe geeignet: Beton, Vollsteine, Lochsteine, Hohlblocksteine.
Bei abweichendem Untergrund ist das Befestigungsmaterial entsprechend auszuwählen.

Die mitgelieferten Dübel sind für folgende Untergründe geeignet: Beton, Vollsteine, Lochsteine, Hohlblocksteine. Bei abweichendem Untergrund ist das Befestigungsmaterial entsprechend auszuwählen.

Bei nicht vorschriftsmäßiger und/oder nicht fachgerechter Montage wird bei Personen- und Sachschäden keinerlei Haftung übernommen!

Achtung: Wichtiger Hinweis zur LED-Beleuchtung:

Anschluß der Leuchten nur an Sicherheitstrafos nach EN 61558 (VDE 570), 12 Volt Gleichspannung (DC). Die Summe der Leistungsaufnahme der angeschlossenen Leuchten (siehe Typenetikett) darf die Trafonennleistung nicht übersteigen!

Beleuchtungsplan MISANO Online ohne FKS

Achtung, max. Belastung vom Trafo beachten! Eine Überlastung vom Trafo verkürzt die Betriebsdauer! Defekt!!!

Wichtiger Hinweis zur LED-Beleuchtung:
Anschluß der Leuchten nur an Sicherheits-
trafos nach EN 61558 (VDE 570), 12 Volt
Gleichspannung (DC).

Beleuchtung testen !
Falls erforderlich, Steckverbindungen
überprüfen. Stecker ganz eindrücken.

LED-Panelbeleuchtungen

2m Zuleitung, 12V-DC (weißes Stecksystem)

LED-"Miniflex"-Klebeband "**LD162**"
L. 1600mm, 19,2 Watt

LED-Nischenbeleuchtungen

Aluprofile eingenutet in Abdeckplatten oder Wandpaneele
2m Zuleitung, 12V-DC (weißes Stecksystem)

LED-"Surflin Mini" (Aluprofil)
"**LM130**" / "**LM98**"
L. 1300mm/ 975mm
12 Watt/ 9,4 Watt

LED-Verlängerung,
2m nur bei Bedarf

LED-Sets für Akzentrückwände

LED-"Miniflex"-Klebeband
2m Zuleitung, 12V-DC (weißes Stecksystem)

LED 6-fach Verteiler 2m

LED-Verlängerung,
2m nur bei Bedarf

LED-Leuchten für Vitrinen "**LEDSET2**"
4x L. 425mm, 20,4 Watt

LED-Elektrostaufach
mit Funkfernbedienung
"**FKS4**" (4-Kanal)
dimmbar max. 30 Watt

4 St. 6-fach Verteiler,
max. 24 Beleuchtungen
max. 30 Watt bei LEVG30
max. 60 Watt bei FKS4-60

bauseitige
Steckdose

Alternativ FKS4-60, 12C-DC (weißes Stecksystem), 60 Watt, 230V
FKS4-60W mit 60-Watt Vorschaltgerät "**FKS4-60**"

EVG-LED, 10 fach-Verteiler, 12V-DC (weißes Stecksystem), 30Watt, 230V
L. 5m, mit Handschalter und Euro-Flachstecker "**LEVG30**"

Beleuchtung testen !
Falls erforderlich, Steckverbindungen
überprüfen. Stecker ganz eindrücken.

Assembly: MISANO "quick-ship"

Caution!

Follow the specifications carefully when fitting wall units.
Secure any elements that may tip with the anti-tip mechanisms supplied.

Please note!

Image 2 Fitting the anti-tip mechanism

On all 8-increment U cabinets, a fixing bracket with metal pins is fitted as an anti-tip mechanism. A 5x60 mm countersunk screw and an 8-mm-dia. plastic wall plug is used to do so. The **13-mm cover panel** only covers the fittings on angled assemblies.

Image 3 Securing the glass shelf to the wall panel

Image 4 Drilling the wall panels and wall unit

The wall plugs supplied are suitable for the following sub-surfaces: Concrete, solid brick, ventilating brick, hollow concrete blocks. If there is a different subsurface, select an appropriate fixing material.

The wall plugs supplied are suitable for the following sub-surfaces: Concrete, solid brick, ventilating brick, hollow concrete blocks. If there is a different subsurface, select an appropriate fixing material.

No liability is assumed for injuries to persons or damage to property in the event of non-compliant and/or incorrect installation.

Important information about LED lighting:

Only connect the lights to the safety transformers in accordance with EN 61558 (VDE 570) using 12-volt direct current (DC). The total power consumption of the connected lights (see type label) must not exceed the nominal transformer capacity.

MISANO Online lighting plan without radio remote control

Caution: Note the maximum transformer load. Overloading the transformer reduces its service life. Fault!

Important information about LED lighting:

Only connect the lights to the safety transformers in accordance with EN 61558 (VDE 570) using 12-volt direct current (DC).

Test the lighting.
If necessary, check the plug
connections. Push the plug in fully.

LED panel lights

2 m supply cable, 12 V-DC (white plug)

LED "Miniflex" adhesive tape **"LD162"**
L. 1600 mm 19.2 watt

LED niche lights

Aluminium profiles grooved in cover panel or wall panel
2 m supply cable, 12 V-DC (white plug)

LED "Surflite Mini" (aluminium profile)
"LM130" / "LM98"
L. 1300 mm/ 975 mm
12 watt/ 9.4 watt

LED extension,
2 m only if required

LED sets for contrasting rear panels

LED "Miniflex" adhesive tape
2 m supply cable, 12 V-DC (white plug)

LED 6-way distributor, 2 m

LED extension,
2 m only if required

LED lights for display units **"LEDSET2"**
4x L. 425 mm, 20.4 watt

LED electrical storage compartment with radio remote control **"FKS4"** (4-channel) Dimmable up to max. 30 watt only if requested by the customer

4 pcs, 6-way distributor,
max. 24 lights, max. 30
watt when using LEVG30
max. 60 watt when using
FKS4-60

On-site
socket

Alternatively: FKS4-60, 12 V-DC (white plug), 60 watt, 230 V
FKS4-60W with 60-watt transformer **"FKS4-60"**

EVG LED, 10-way distributor, 12 V-DC (white plug), 30 watt, 230 V
length 5 m, with manual switch and flat Euro plug **"LEVG30"**

Test the lighting.
If necessary, check the plug
connections. Push the plug in fully.
