F Notice de montage

Vorbereitung der Montage

Benutzerhandbuch:

Bitte prüfen Sie sämtliche lokalen Baunormen betreffend Fundamente, Standort und andere Anforderungen, bevor Sie mit der Montage beginnen.

Montageanweisungen:

Lesen Sie sämtliche Anweisungen und die entsprechenden Informationen, bevor Sie beginnen, und führen Sie die Schritte sorgfältig in ihrer jeweiligen Reihenfolge aus, damit die Montage ein Erfolg wird.

Bodengrundlage:

Ein guter Standort für den Lagerschuppen ist eine rechteckige und ebene Fläche, an der das Wasser gut ablaufen kann. Die Grundplatte ist nicht im Kit enthalten und muss gegebenenfalls separat gekauft werden oder Sie müssen ein eigenes Fundament oder ein Verankerungssystem errichten.

Unter das Fundament sollte eine starke Kunststoffplatte (Dicke: mindestens 150µm) gelegt werden, damit die Feuchtigkeit vom Boden abgewiesen wird und somit die Kondensation in Ihrem Schuppen reduziert wird. Ihr Lagerschuppen muss verankert sein, um eine Beschädigung durch Wind zu vermeiden. Nach der Befestigung wird dringend empfohlen, Silikon auf der Innenseite der Fundamentschiene aufzutragen, um Kondensation zu reduzieren.

Teile und Teileliste:

Trennen und identifizieren Sie vor dem Beginn sämtliche Teile und Geräte, um sicherzustellen, dass Sie alle notwendigen Teile für Ihr Gebäude haben (siehe Seite mit der Teileliste).

Wenn ein Teil fehlt, benachrichtigen Sie den Verkäufer innerhalb einer Woche nach Erhalt des Produktes: Versuchen Sie nicht, das Gebäude zu errichten, wenn Teile fehlen, da ein nur teilweise zusammengebautes Gebäude schon durch kleine Windstöße schwer beschädigt werden kann.

Es wird auch empfohlen, die Montage innerhalb eines Tages abzuschließen, um eine Beschädigung des Produktes oder den Verlust kleiner Teile zu verhindern.

Benötigtes Werkzeug:

(Bitte lösen Sie die Schutzschicht vor dem Zusammenbau ab, bewahren Sie die Teilenummer aber bei Bedarf auf).

Sicherheit steht an erster Stelle:

1. Wählen Sie einen trockenen und windstillen Tag für die Montage Ihres Produktes aus. Die Montage erfordert Teamarbeit (zwei oder mehr Personen). Es wird auch empfohlen, die Montage innerhalb eines Tages abzuschließen, um eine Beschädigung des Produktes oder den Verlust kleiner Teile zu verhindern.
2. Tragen Sie während der Montage Sicherheitshandschuhe, eine Schutzbrille und ein T-Shirt mit langen Ärmeln, um Verletzungen zu verhindern. Achten Sie auf spitze Kanten einiger Teile;
3. Kinder und Haustiere müssen dem Montageort fernbleiben;
4. Belasten Sie das Dach des Gebäudes nie mit Ihrem gesamten Körpergewicht. Achten Sie bei der Verwendung einer Leiter auf Ihre Sicherheit;

Pflege & Instandhaltung:

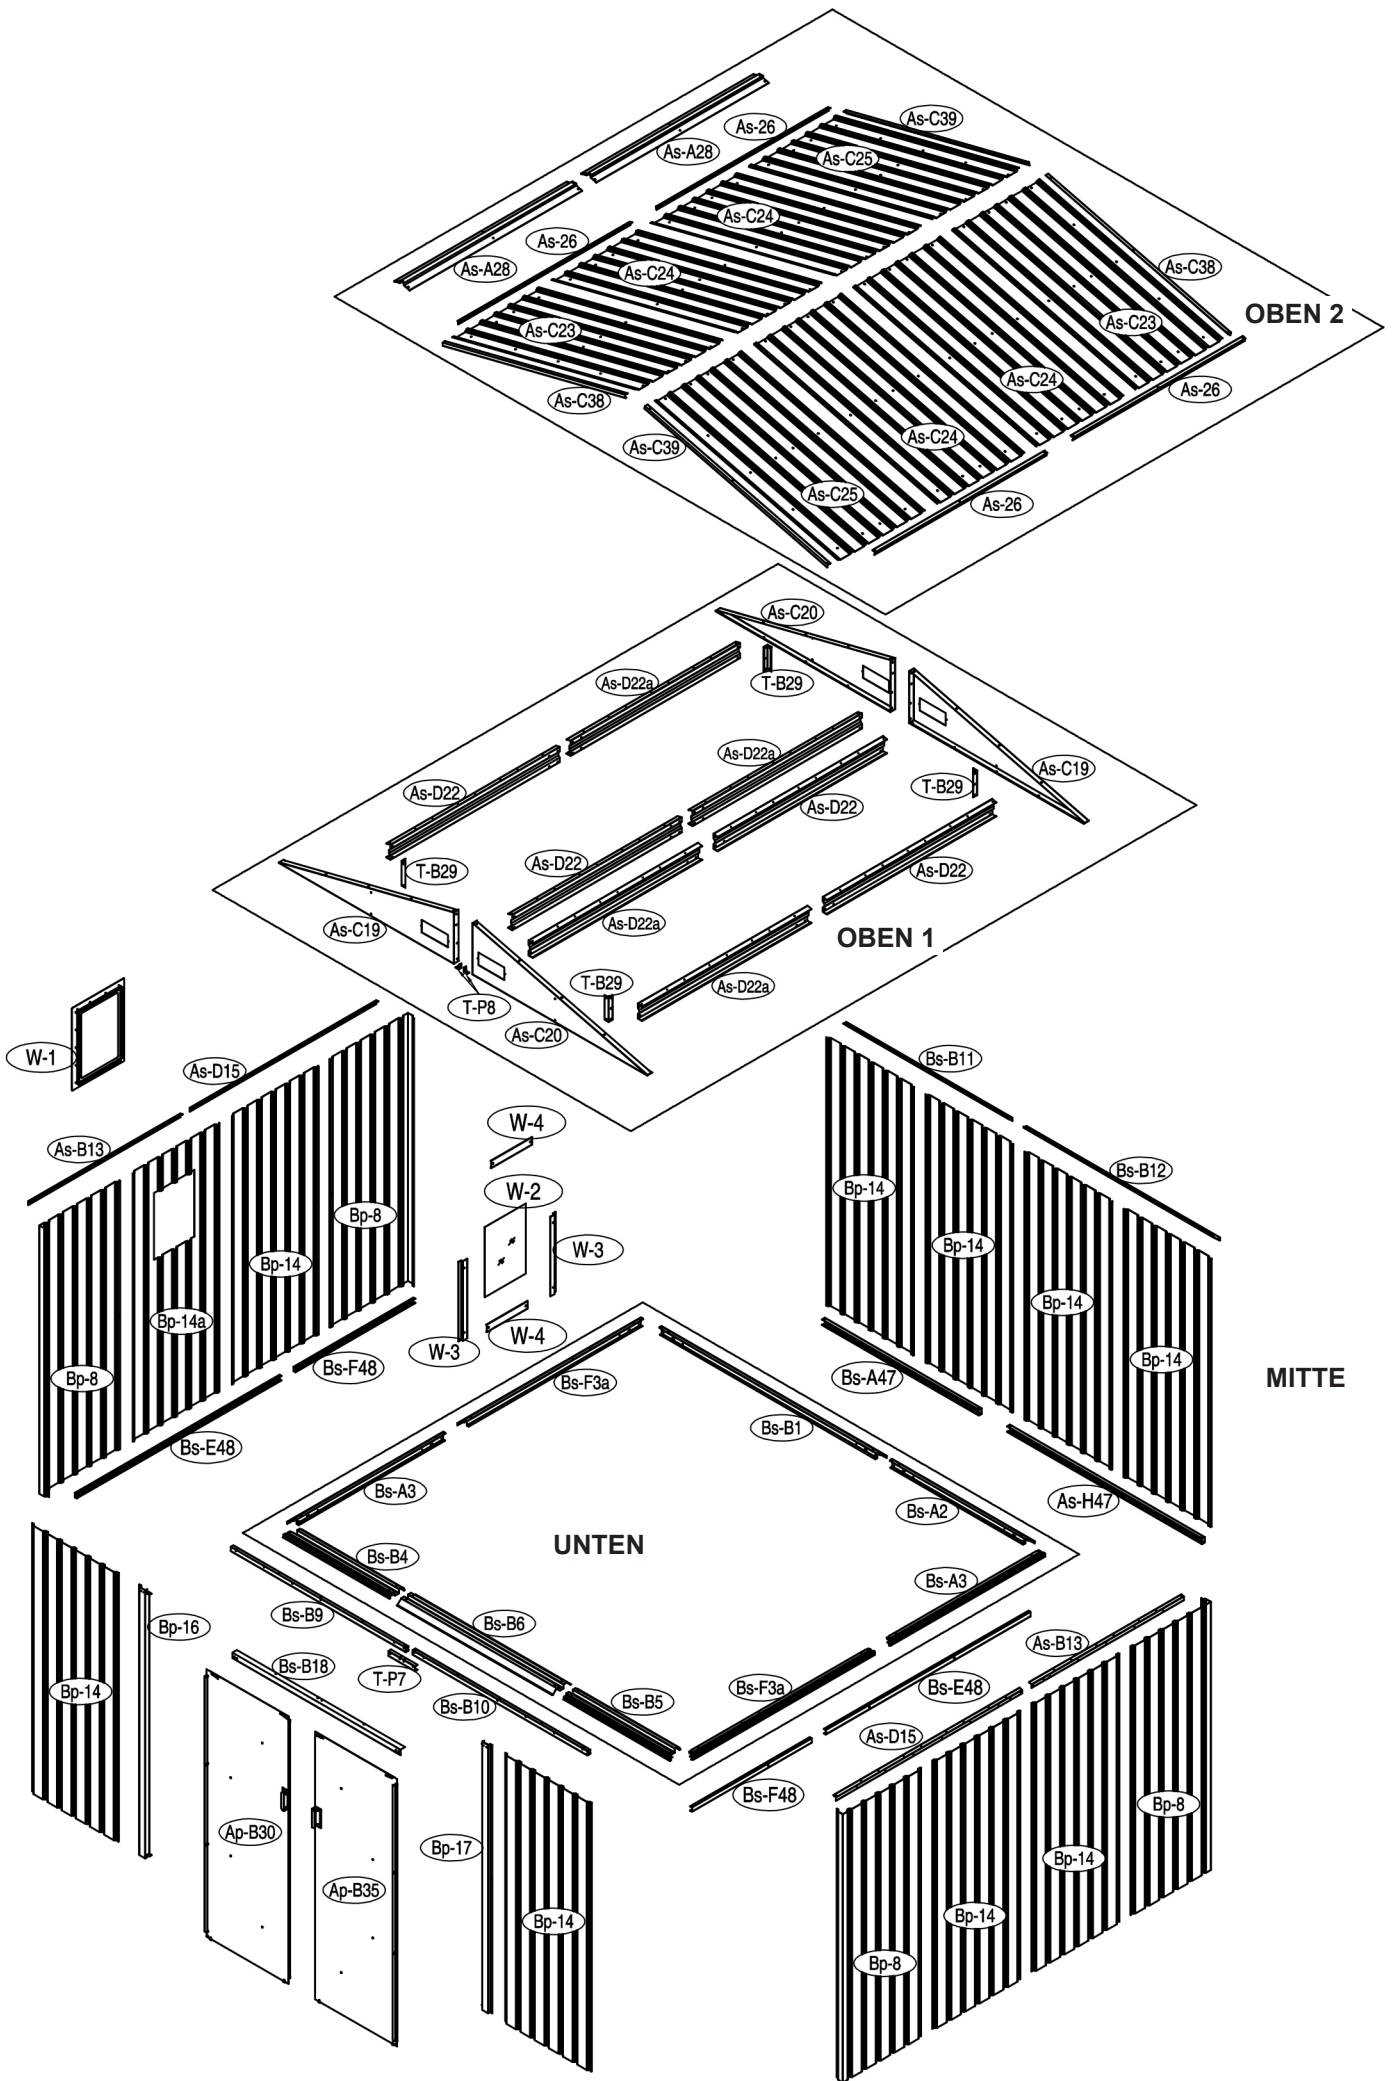

1. Halten Sie den Schuppen mit einem weichen Tuch, ggf. unter Verwendung von Wasser, sauber;
2. Halten Sie die Türschiene frei von Schmutz und anderen Materialien, damit die Tür einwandfrei bedient werden kann.
3. Beseitigen Sie Schnee mit entsprechenden Werkzeugen, um ein gefahrenfreies Eintreten in den Schuppen zu ermöglichen.
4. Der Schuppen eignet sich nicht zum Wohnen sondern ist für das Lagern von Materialien gedacht.
5. Geben Sie bitte etwas Öl oben und unten in den Schiebekanal der Tür, damit die Türen reibungslos geöffnet werden können.

METALEN SCHUUR ARCHER PLUS-D

D Montageanleitung

IT Istruzioni di montaggio

NL Montagehandleiding

GB Assembly instructions

F Notice de montage

Instructie nr.: Archer Plus-D

Vorbereiding montage

Gebruikershandleiding

Ga voordat u begint met de montage na wat de lokale bouwnormen zijn voor fundamente en ligging en of er andere vereisten zijn.

Montage-instructies:

Lees de instructies en informatie door voordat u begint, en voer de stappen zorgvuldig en in de juiste volgorde uit, zodat de montage succesvol is.

Ondergrond:

Een goede locatie voor het schuurtje is een rechthoekig en effen oppervlak, vanwaar het water goed kan aflopen. De bodemplaat is niet inbegrepen en moet eventueel apart worden gekocht, of u moet zelf voor een fundament of verankeringssysteem zorgen.

Onder het fundament moet een sterke kunststofplaat (minstens 150 µm dik) worden gelegd, zodat er geen bodemvocht doordringt en de condensatie in de schuur zo wordt gereduceerd. De schuur moet verankerd zijn zodat deze niet door wind wordt beschadigd. Het is dringend aan te raden om na het bevestigen siliconenkit aan te brengen aan de binnenkant van de fundamente rails, om condensatie te reduceren.

Onderdelen en onderdelenlijst:

Haal voordat u begint de verschillende onderdelen en apparaten uit elkaar en breng deze in kaart, zodat zeker is dat u over alle noodzakelijke onderdelen beschikt (zie pagina met onderdelenlijst).

Als er een onderdeel ontbreekt, dient u dit binnen een week na ontvangst van het product aan de verkoper mee te delen: Probeer het gebouw niet op te zetten als er onderdelen ontbreken, aangezien een slechts gedeeltelijk opgebouwd gebouw al door kleine windstoten zwaar kan worden beschadigd.

Het is ook aan te raden om de montage binnen een dag klaar te hebben, om te vermijden dat het product wordt beschadigd of kleine onderdelen kwijtraken.

Benodigd gereedschap:

(Haal de beschermlaag er voor het opbouwen af, maar bewaar indien nodig de onderdelennummers)

Veiligheid staat op nummer één:

1. Kies een droge en windstille dag uit voor de montage van het product. Voor de montage is teamwerk nodig (twee personen of meer). Het is ook aan te raden om de montage binnen een dag klaar te hebben, om te vermijden dat het product wordt beschadigd of kleine onderdelen kwijtraken.
2. Draag tijdens de montage veiligheidshandschoenen, een veiligheidsbril en een t-shirt met lange mouwen, om verwondingen te vermijden. Denk eraan dat sommige onderdelen scherpe randen hebben.
3. Kinderen en huisdieren mogen zich niet in de buurt van de montage ophouden.
4. Belast het dak van het gebouw nooit met uw volledige lichaamsgewicht. Let bij het gebruik van een ladder op uw eigen veiligheid.

Onderhoud:

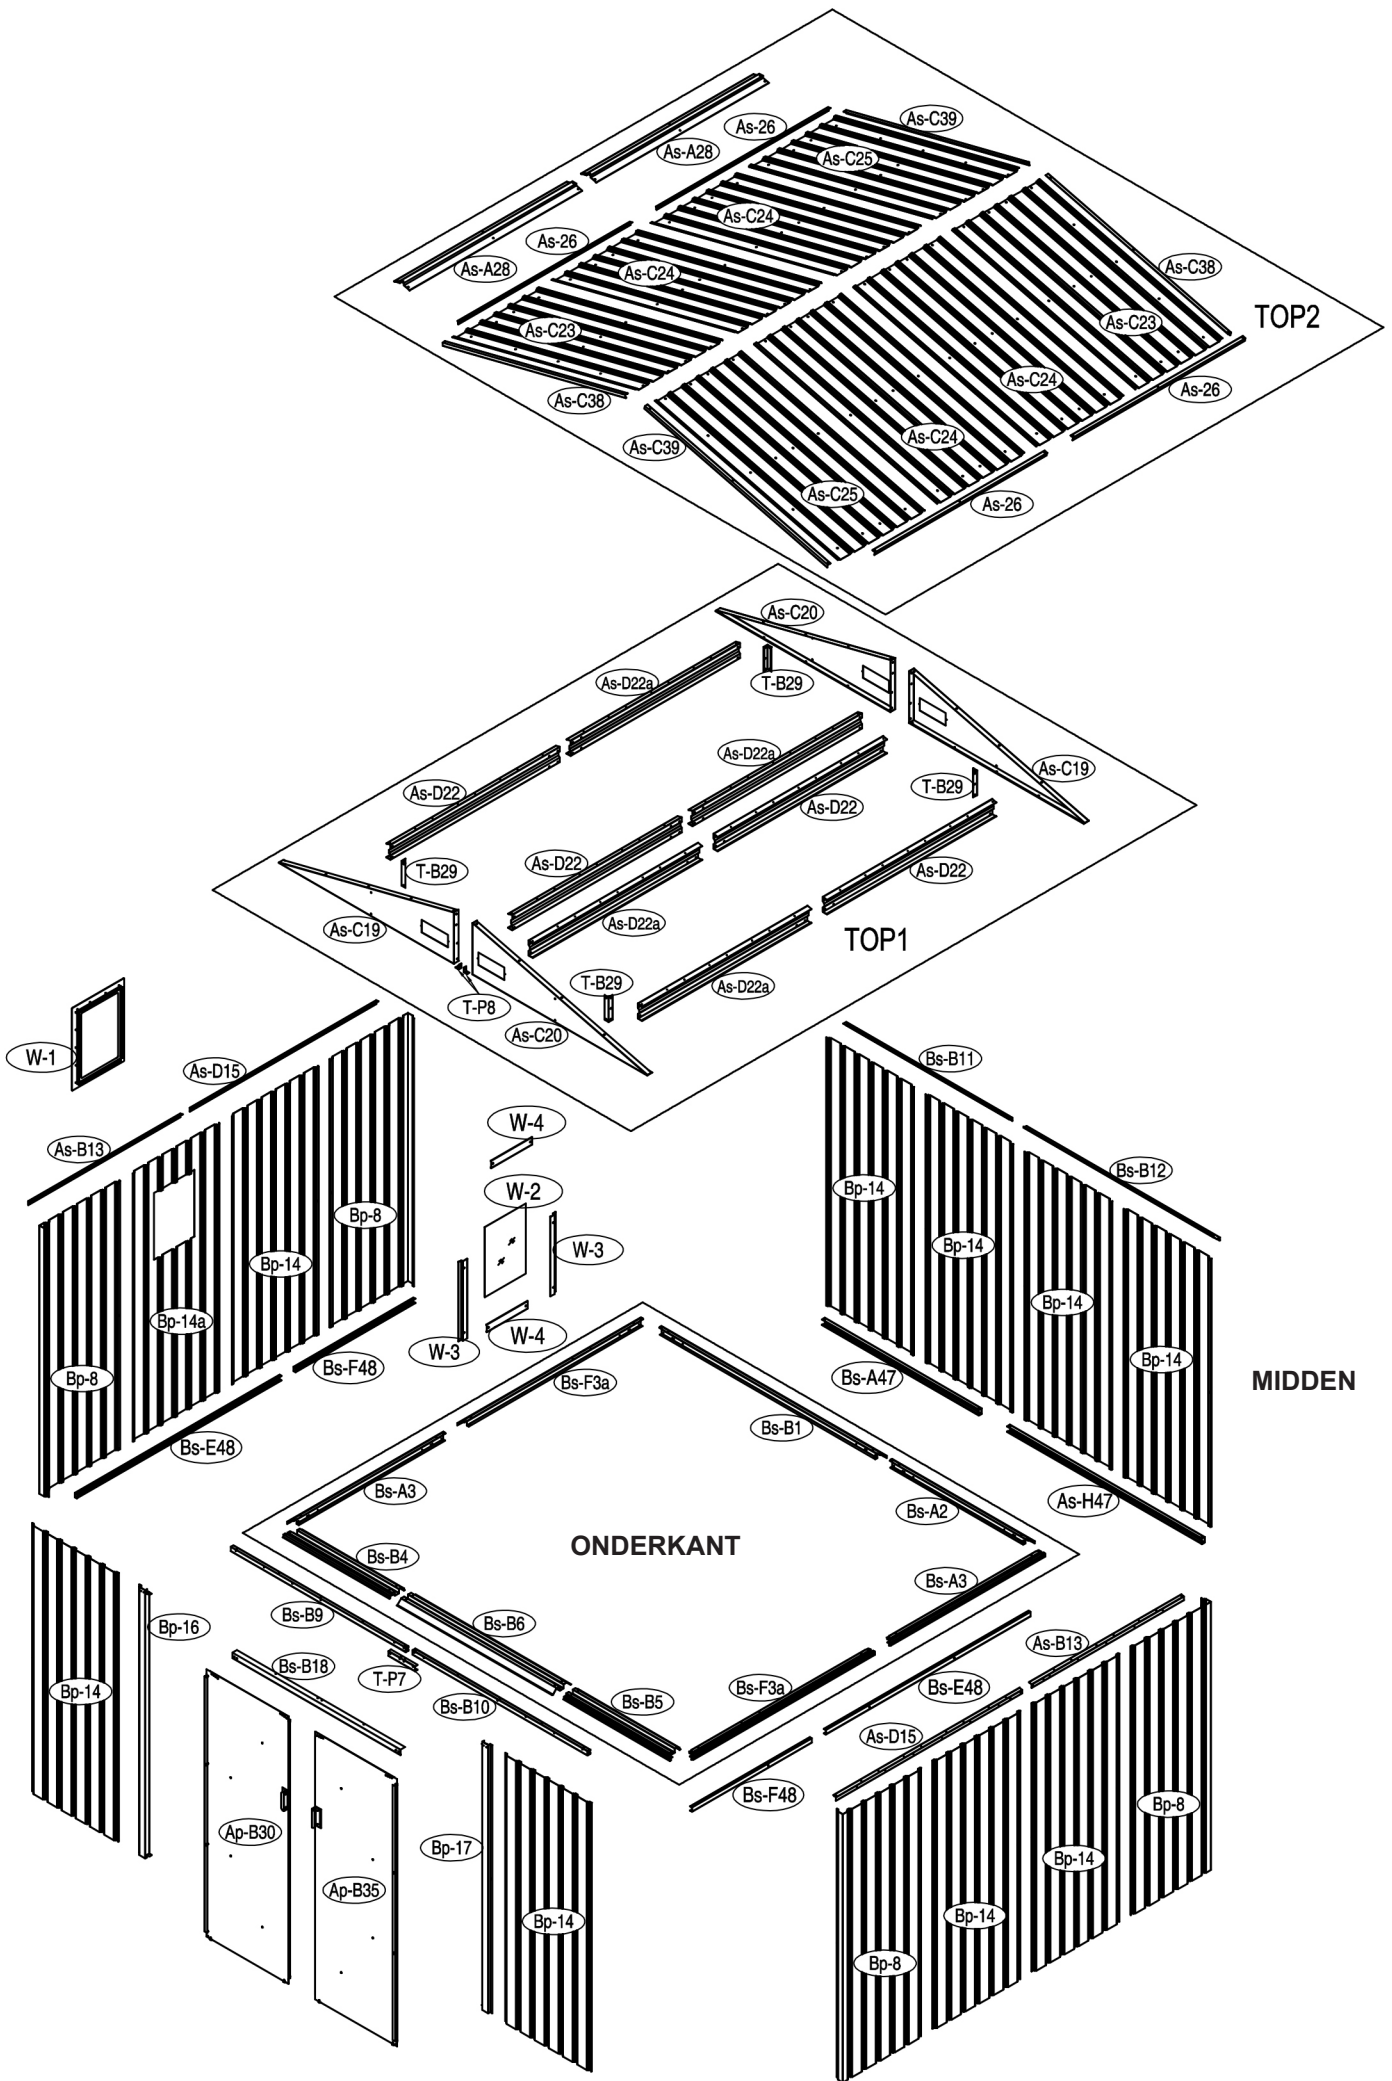

1. Houd de schuur schoon met een zachte doek, gebruik eventueel water.
2. Houd de deurrails schoon, zodat de deur zonder problemen kan functioneren.
3. Verwijder sneeuw met passend gereedschap, zodat er zonder gevaar de schuur in kan worden gegaan.
4. De schuur is niet geschikt om in te wonen, maar is gedacht voor het opruimen van materialen.
5. Doe een beetje olie boven- en onderin de glijarm van de deur, zodat de deuren soepel opengaan.

D Montageanleitung

IT Istruzioni di montaggio

NL Montagehandleiding

GB Assembly instructions

F Notice de montage

Assembly Preparation

Owner's Manual

Please check local building codes regarding footings, location and other requirements before beginning construction.

Assembly instructions:

Reviewing all instructions and the appropriate information before you begin, make sure following the step sequence carefully for successful results.

Flooring base:

A good location for the storage building is a square and level area with good drainage. The base is not included in the kit which may need purchase separately or may construct a foundation and anchoring system of your own.

A strong plastic sheet (thickness: at least 150µm) should be placed under the foundation to assist in reducing rising dampness from the soil, thus reducing condensation build up in the shed. Your storage building must be anchored to prevent wind damage. Once secured, it is highly recommended applying silicone along the inside of the base rail to minimize condensation.

Parts and Parts List:

Before you start, separate and identify all the parts and hardware to be sure that you have all the necessary parts for your building (refer to the Parts List Page).

If you find that a part is missing, please notify the seller within one week after receiving the product. Do not attempt to assemble the building if parts are missing because any building left partially assembled may be seriously damaged by light winds.

Tools you need:

(Please tear off the safety protection layer before the assembly, keep the part number label if needed)

Safety must be put in the No. 1 position:

1. Select a dry and calm day for your assembly. Team works (Two or more people) are required during the assembly. It is also recommended to finish the assembly in a day to avoid damage to the product or missing of some small parts.
2. Wearing safety gloves, eye protection and long sleeves during the assembly to prevent injury. Pay attention to the sharp edge of some parts.
3. Children and pets are not allowed entering into the construction site.
4. Never concentrate your total weight on the roof of the building. When using a step ladder make sure that it is safe.

Care & Maintenance:

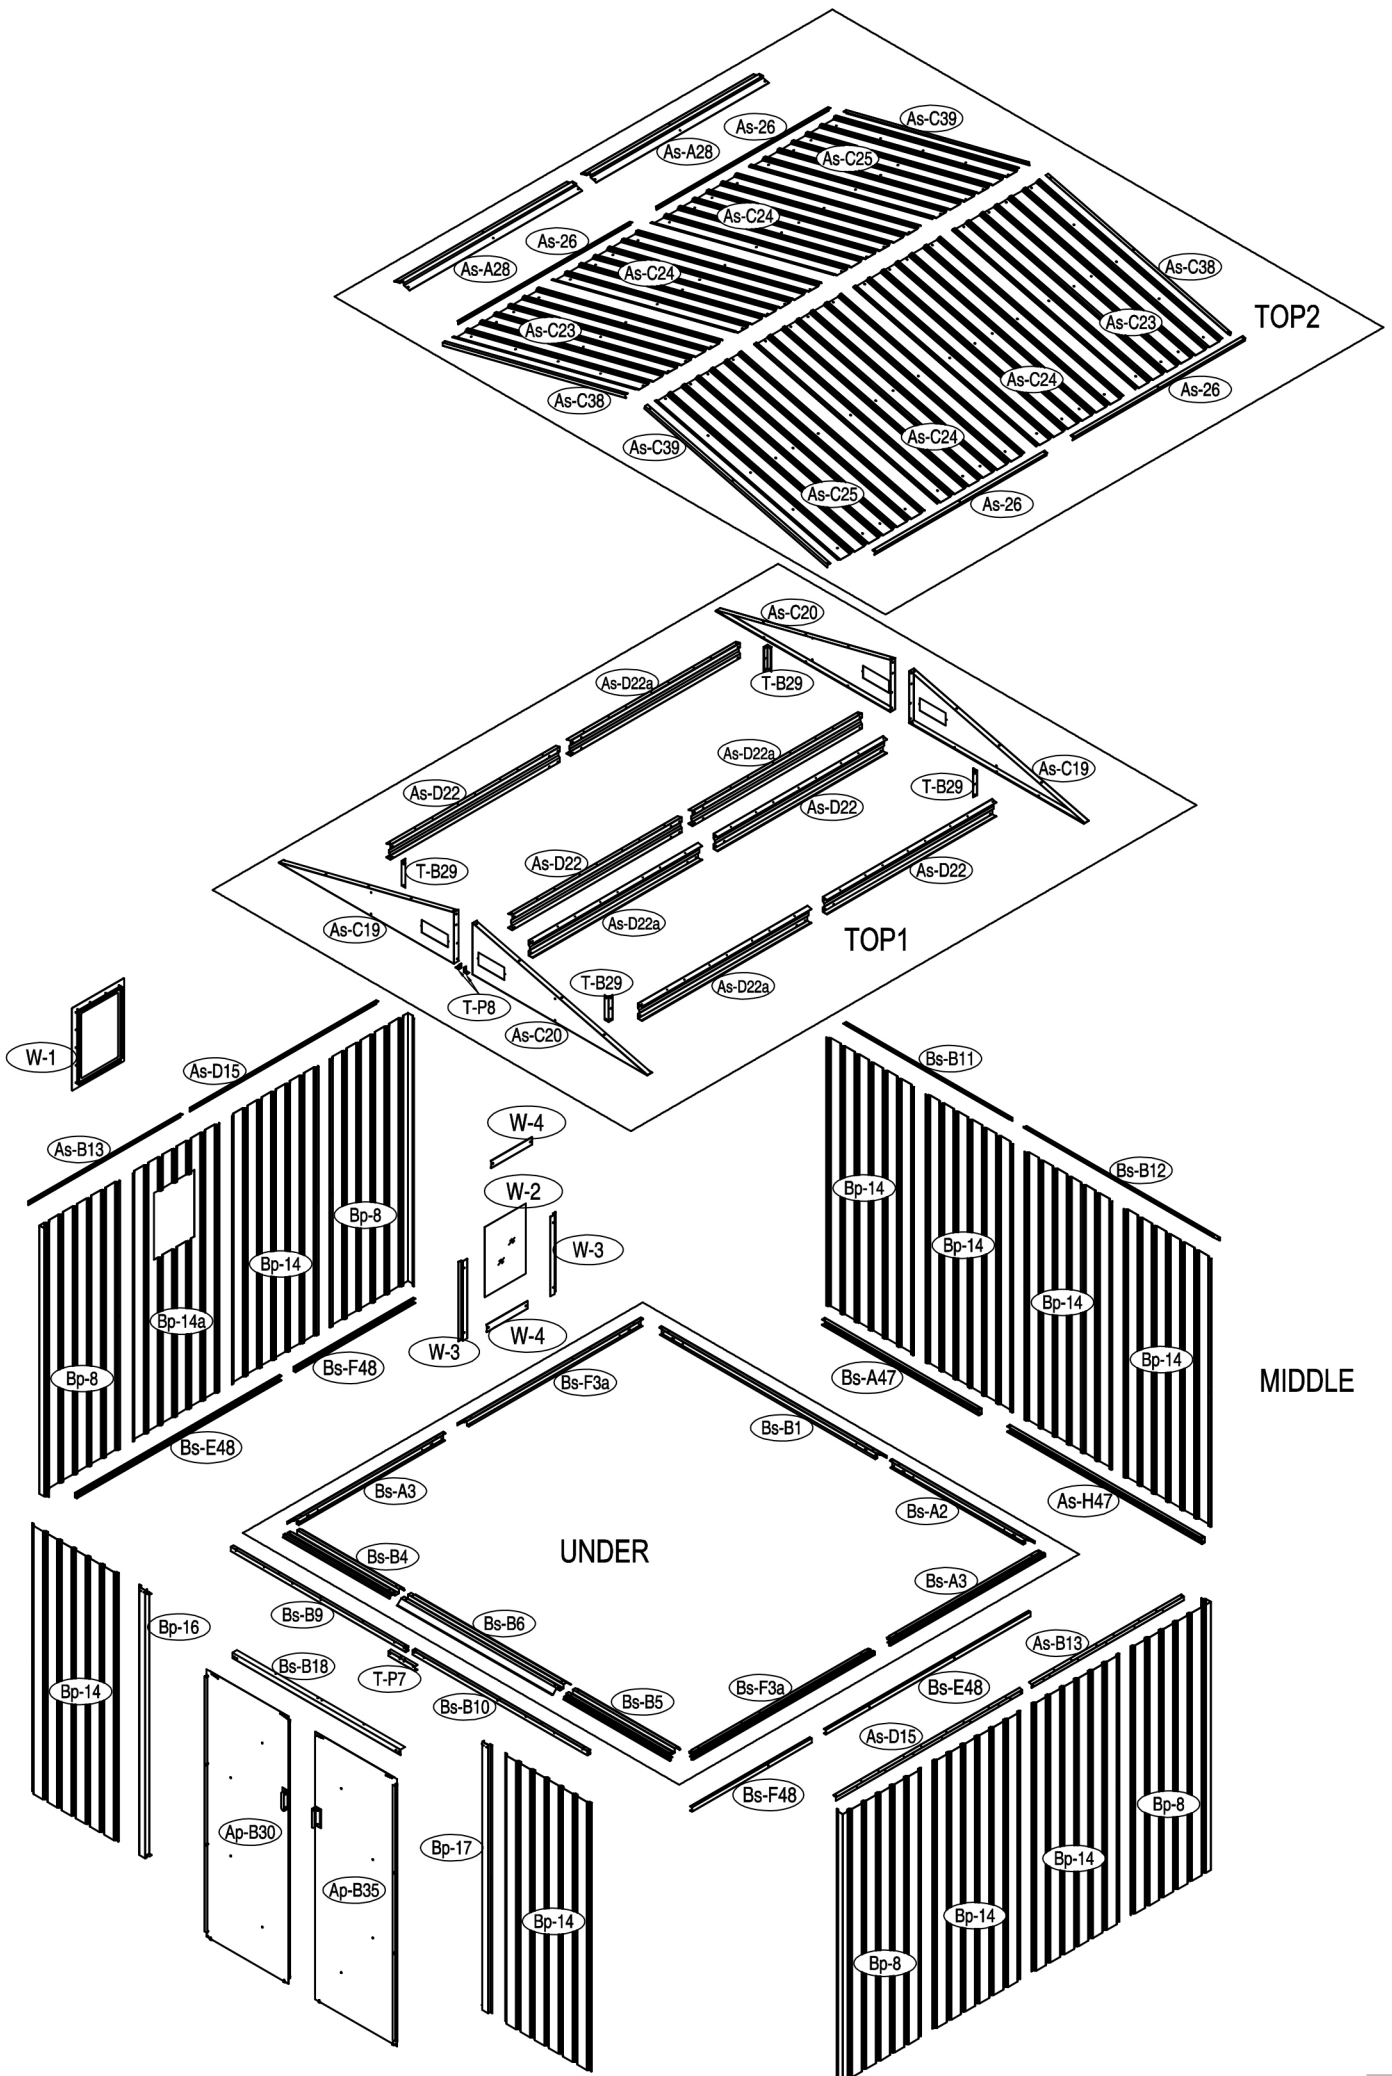

1. Keep the shed clean with soft cloth, use water if necessary.
2. Keep the door tracks clear of dirt and other stuff that prevent them from sliding easily.
3. Clean the snow with necessary tools to make sure it is safe to enter into.
4. The shed is not made for living but storing stuff.
5. Please add some oil on the top and bottom door sliding channel to make door slides smoothly.

ABRI EN MÉTAL ARCHER PLUS-D

D Montageanleitung

IT Istruzioni di montaggio

NL Montagehandleiding

GB Assembly instructions

F Notice de montage

Préparation du montage

Veillez vérifier l'ensemble des normes de construction locales en matière de fondations, de site et d'autres exigences avant de commencer le montage.

Instructions de montage :

Lisez l'ensemble des instructions et des informations correspondantes avant de commencer et exécutez les étapes méticuleusement dans leur ordre respectif pour que le montage soit un succès.

Sol :

Un bon emplacement pour l'abri est une surface rectangulaire plane sur laquelle l'eau peut facilement s'écouler. La fondation n'est pas comprise dans le kit et doit être achetée si nécessaire séparément, ou bien vous devez construire une fondation ou un système d'ancrage propre.

Une plaque en plastique solide (épaisseur : minimum 150µm) doit être placée sous la fondation pour évacuer l'humidité du sol et ainsi réduire la condensation dans votre abri. Votre abri doit être ancré pour éviter toute détérioration due au vent. Une fois fixé, il est fortement recommandé d'appliquer du silicone sur le côté intérieur du rail de fondation pour éviter toute condensation.

Pièces et liste de pièces :

Avant de commencer, séparez et identifiez toutes les pièces et tous les appareils pour vous assurer que vous disposez de toutes les pièces nécessaires pour votre construction (voir page avec la liste de pièces).

Si une pièce manque, informez-en le vendeur en l'espace d'une semaine suivant la réception du produit : N'essayez pas de monter l'abri s'il vous manque des pièces, un abri partiellement monté seulement risquant d'être gravement endommagé par de petites rafales de vent.

Il est également recommandé d'exécuter le montage en une journée, afin d'éviter tout endommagement du produit ou la perte de petites pièces.

Outils nécessaires :

(Veillez retirer la pellicule protectrice avant le montage, conservez les numéros de pièces en cas de besoin)

La sécurité est primordiale :

1. Choisissez une journée sèche et sans vent pour monter votre produit. Le montage est un travail d'équipe (deux personnes ou plus). Il est également recommandé d'exécuter le montage en une journée, afin d'éviter tout endommagement du produit ou la perte de petites pièces.
2. Durant le montage, portez des gants de sécurité, des lunettes de protection et un T-shirt à manches longues pour éviter toute blessure. Faites attention aux angles pointus de certaines pièces ;
3. Enfants et portes de la maison doivent être loin de l'emplacement de montage ;
4. Ne chargez jamais le toit de l'abri avec tout le poids de votre corps. Lorsque vous utilisez une échelle, veillez à votre sécurité ;

Entretien & maintenance :

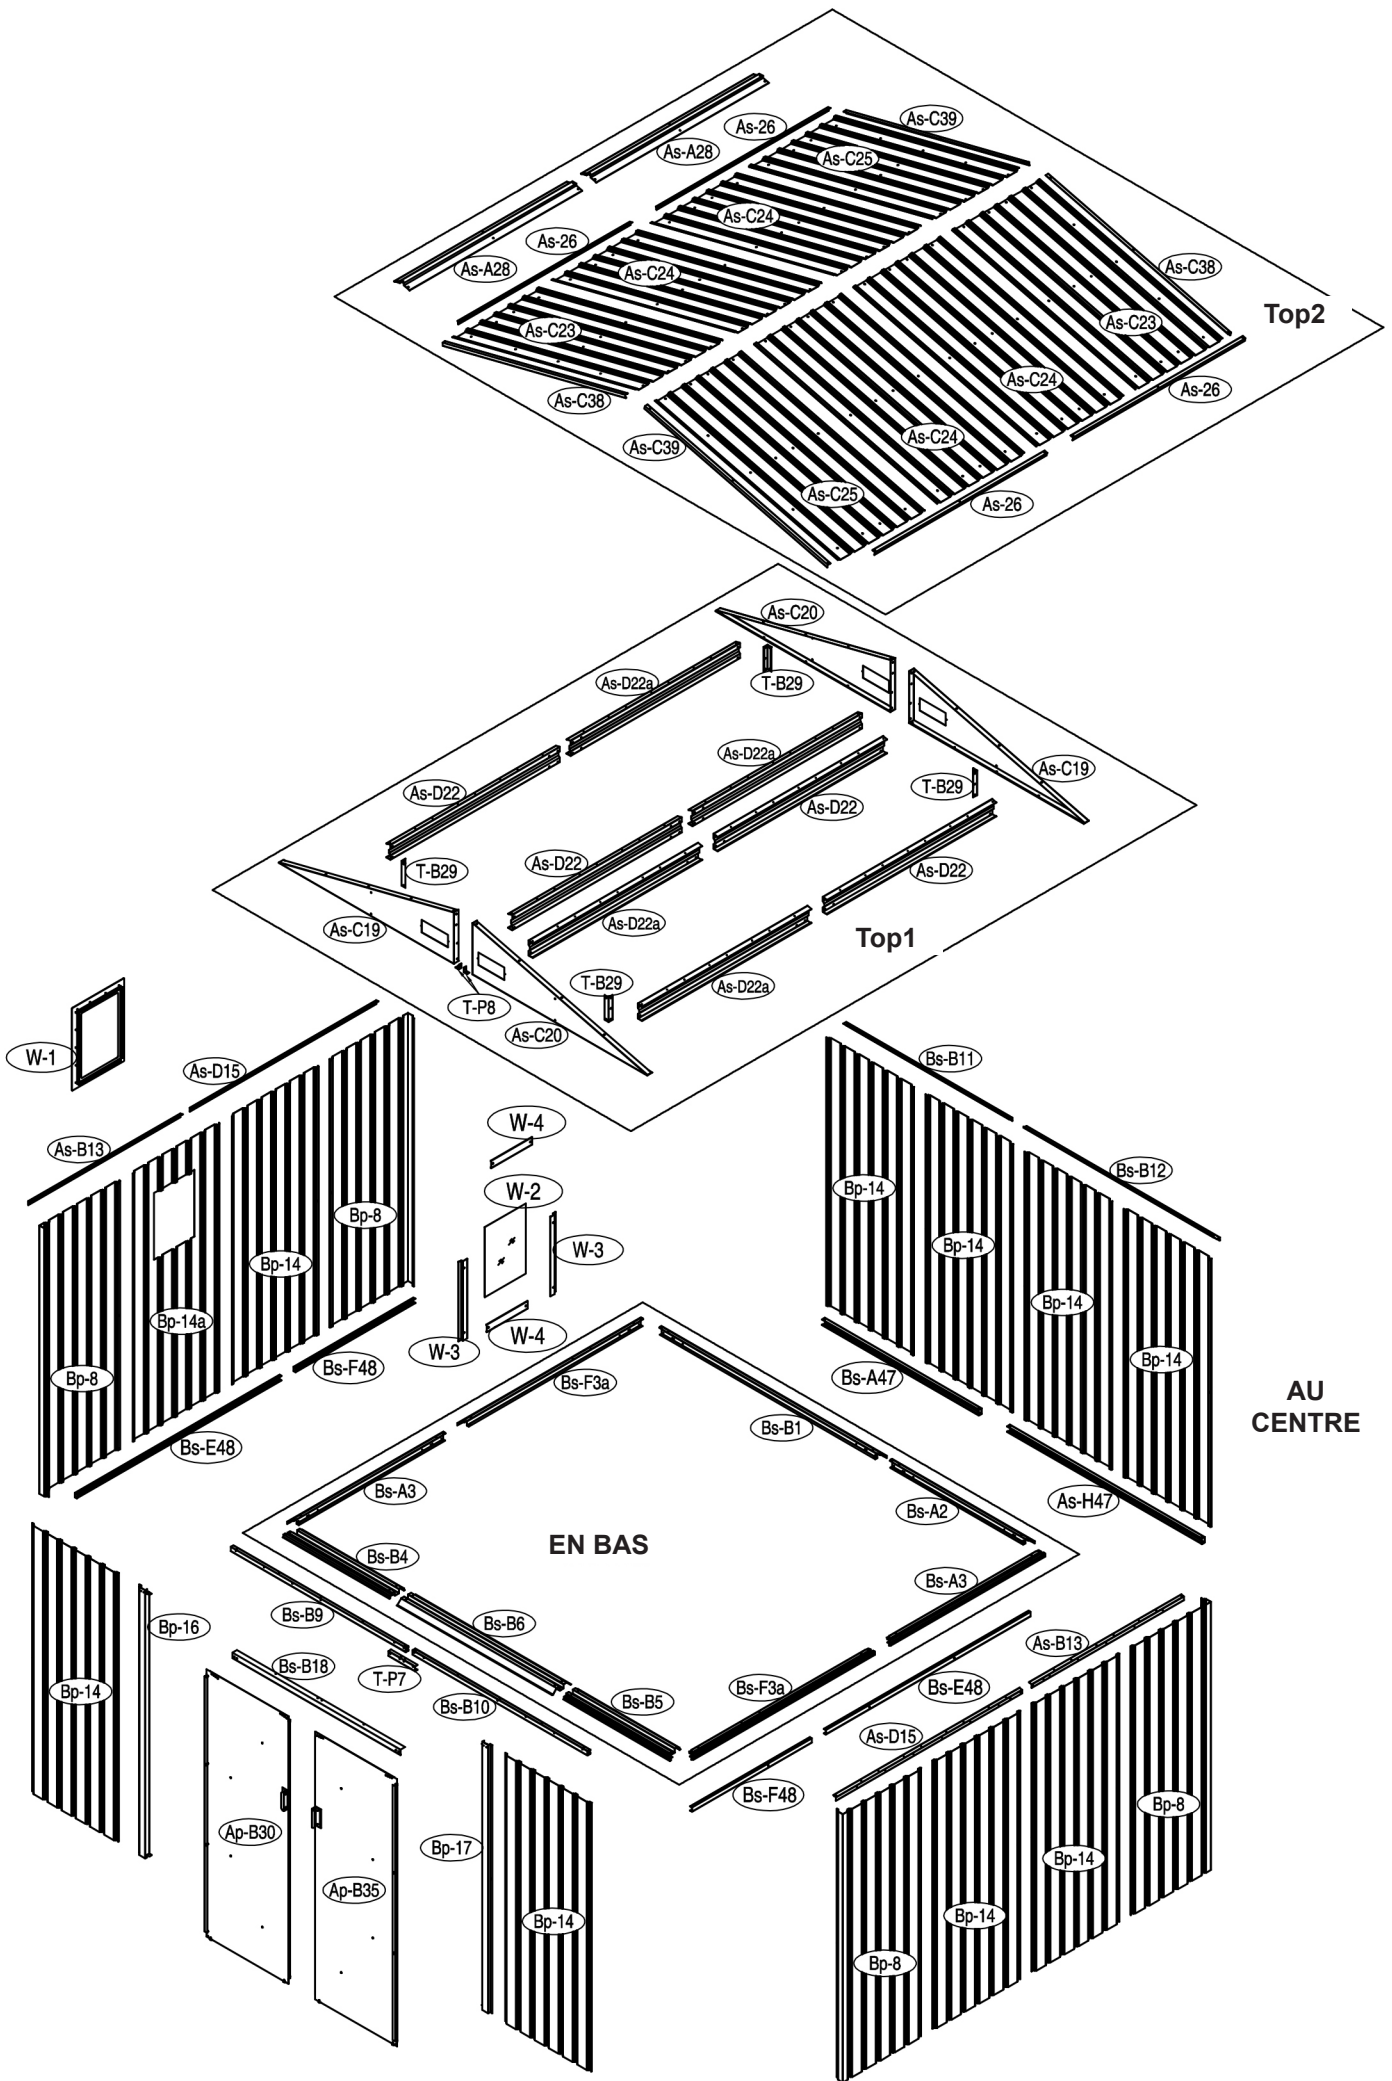

1. Gardez l'abri propre en utilisant un chiffon doux et si nécessaire de l'eau ;
2. Gardez les rails des portes exempts de salissures et de tout autre matériel, pour que la porte puisse être actionnée sans problème.
3. Éliminez la neige à l'aide d'outils adaptés afin de pouvoir entrer sans risque dans l'abri.
4. L'abri n'est pas fait pour y habiter mais est conçu pour y stocker du matériel.
5. Veillez ajouter un peu d'huile dans le canal coulissant de la porte pour que les portes puissent s'ouvrir sans problème.

AproductZ GmbH

Werner-Otto-Straße 1-7, 22179 Hamburg, Germany

D

Bitte beachten!

Zuerst alle Schrauben von Hand montieren, erst danach alle Verbindungen festziehen!

NL

Let op!

Monteer eerst alle schroeven handmatig en trek daarna pas alle verbindingen stevig aan!

FR

Veillez noter !

Insérer d'abord toutes les vis à la main, puis ensuite bien serrer tous les raccords!

IT

Nota bene!

Montare tutte le viti prima a mano e stringere i collegamenti successivamente!

GB

Please note!

First, install all screws by hand, then tighten all connections!
