1. Data from HONOR labs. Actual dimensions may vary based on the configuration, manufacturing process, and measurement method. The thickness (6.78mm) of the tablet does not include the camera bump.

2. Data from HONOR labs. Total weight include battery. Actual weight may vary due to product configurations, manufacturing processes, and measuring methods.

3. Color availability may vary by region.

4. With rounded corners design applying on the display, the diagonal length of screen is 6.7 inches, when measured according to the standard rectangle (the actual viewable area is slightly smaller).

5. The phone is not medical equipment and is not available for treatment.

6. The 3240Hz ultra-high frequency PWM dimming technology of HONOR X8b is TÜV Rheinland Flicker-free certified and achieves the risk-free dimming level. The testing standard for the TÜV Rheinland Flicker-free certification follows the correlation between the flicker risk level and the flicker frequency in the IEEE Std 1789-2015 standard, which defines the flicker-free level as when the dimming frequency is higher than 3125Hz.

7. The screen supports a maximum refresh rate of 90Hz, and the refresh rate may be varied slightly under different app interfaces and game quality. Please refer to your actual experience.

8. The brightness data comes from HONOR labs and only takes effect in some scenarios. Please refer to the actual experience.

9. The resolution is measured as a standard rectangle. With a rounded corners design, the effective pixels are slightly less.

10. Data from HONOR labs.

11. Typical value. The rated capacity of the non-removable battery is 4400mAh.

12. The actual charging power may vary with different scenarios intelligently. Please refer to actual situations.

13. The availability of dual stand-by may vary by region.
