**Overview**

**100 Word Product Description**

The CORSAIR NAUTILUS RS Liquid CPU Cooler showcases CORSAIR's excellence in engineering and design, offering efficient, low-noise cooling with straightforward connectivity – no controller required, just plug directly into your motherboard. Its slightly convex cold plate with pre-applied thermal paste ensures superior thermal transfer, while RS120 fans maintain low temperatures for maximum CPU performance. Simplify your build with easy, daisy-chained connections and precise cooling control via a 4-pin PWM fan header. For more advanced control, an optional iCUE controller and adapter cable (sold separately) can be used. Supporting a wide range of Intel® and AMD® CPU sockets, including LGA 1851, the NAUTILUS RS offers broad system compatibility.

**Features**

- **Simple, High-Performance All-in-One CPU Cooling:** Renowned CORSAIR engineering delivers strong, low-noise cooling that helps your CPU reach its full potential.
- **Efficient, Low-Noise Pump:** Keeps your coolant circulating at a high flow rate while generating a whisper-quiet 20 dBA.
- **Convex Cold Plate with Pre-Applied Thermal Paste:** The slightly convex shape ensures maximum contact with your CPU's integrated heat spreader, with thermal paste applied in an optimized pattern to speed up installation.
- **RS120 Fans:** RS fans create strong airflow with the high static pressure necessary to drive air through the radiator. CORSAIR AirGuide technology and Magnetic Dome bearings ensure great cooling performance and low noise.
- **Easy Daisy-Chained Connections:** Reduce the wiring in your system by daisy-chaining your RS fans and connecting them to a single 4-pin PWM fan header on your motherboard.
- **Quiet PWM-Controlled Cooling and Zero RPM Mode:** Dictate your exact fan speeds up to 2,100 RPM with PWM control, plus support for Zero RPM PWM signals allows fans to stop entirely at low temperatures, eliminating fan noise completely.
- **Wide Compatibility:** Supports a wide range of Intel® and AMD® socket types, including the latest cutting-edge LGA 1851.
- **iCUE-Ready:** Connect to a CORSAIR iCUE controller such as the COMMANDER CORE XT (controller and adapter cable sold separately) for more advanced control over your fans and pump using iCUE software.
